■ Descriptions:

The ITR9813(Slot Optical Switch) is a gallium arsenide infrared emitting diode which is coupled with a silicon photodarlington in a plastic housing. The packaging system is designed to optimizes the mechanical resolution, coupling efficiency, and insulates ambient light. The slot in the housing a provides a means of interrupting the signal with printer, scanner, copier, or other opaque material, switching the output from an " ON" to" OFF" state.

■ Features:

- Wide gap between light emitter and detector(5.0mm)
- High sensing accuracy
- PWB mounting type package
- Pb free
- The product itself will remain within RoHS compliant version.

■ Applications:

- Copier
- Printer
- Facsimile
- Ticket vending machine
- Opto-electronic switch
